The story of 21K School coming to life is as interesting as its concept.

Coming from varied
backgrounds, they hit a
common ground and
then came the
euphoria moment.

Two of them were alumni of foreign universities, one was an IITian and the other was a veteran already in managing schools all over India. What brought them together was their understanding of the vast role of education in turning the future of our country and also of the problems plaguing the education system here. They put on their thinking caps and conceived the roadmap for India's first online-only school that offers Indian, American, and British Curriculum.

MESSAGE FROM FOUNDERS

21K School is the first online only school in India and is known for its intellectual rigor, application based learning, flexible options, trained faculty, an environment of collective learning in a community that grows together instead of competing with each other.

Our school model enables us to reach students in the remotest corners of the country and the world making world class education accessible to them in their homes. Through its dynamic curriculum, partnerships with Stride Inc and Nisai Group, the engagement of the faculty, and an online campus, 21K School challenges students to be enlightened thinkers and prepares them to be global citizens who will thrive in life and in work.

At the core of 21K School is one of the most relevant learning experiences in the country. We realise that mastery of the “3 R's” (reading, writing, and arithmetic) is no longer enough, nor is the superficial recollection of facts. What is needed is deeper learning of content through its application in solving real-life issues. Also, content knowledge needs to be complemented with

the purposeful development of critical skills (problem-solving, creativity, communication, collaboration) and universal human values (empathy, positivity, equanimity, and the ethic of excellence). In addition to paying attention to individual needs of students, they are taught to think critically, communicate powerfully, analyse other perspectives, and solve complex problems.

21K is a unique amalgamation of a close-knit community and global exposure. We are small enough for students to build relationships with their teachers, yet large enough to incorporate varied international curriculums that put students right on the top from where they lead. By connecting learning with real-world applications, having an interdisciplinary approach, data-driven performance assessment and the teacher who is a mentor and a facilitator, we get to enhance creativity, critical thinking, collaboration, communication and character of each student.

Students from each class here have many laurels under their belt, some pursuing their artistic inclinations while others are training hard to be global athletes. Some with their thoughts and debating skills want to change the world, while others with their tech skills want to re-imagine the future. At 21K School, academics and pursuing multiple passions are clear priorities. Here learning and growing as a team and as one community that collaborates is given utmost importance.

It is our mission to develop thinkers who value intellectual rigour and who are capable of challenging themselves and others with reason. Our students carry our values. This is 21K School, a distinctive, vibrant, and welcoming place to learn, live, and develop into who you are.

FROM THE PRINCIPAL'S DESK

Ms. Aruna Shetty

Welcome to 21K School! With delight I present this Annual Report which enumerates the labour of love, activities, and achievements of the school during the academic year 2020- 21. While we certainly celebrate the role of technology and all the opportunities that it affords us as part of our teaching and learning here at 21K, in the final analysis our work here is of course part of something much, much bigger. At this end of the year, it is good to take a moment to look back and to celebrate it all... the successes, the challenges, the learning, the relationships, the questions, the quality conversations, the robust discussions, the decisions, the opportunities for growth and so much more. Teaching and parenting is of course, a privileged, sacred trust and it is very clear that the closer we can work together, the more fruitful the opportunities for each and every child continue to be in our school.

As an Academic Head and new Principal to 21K School in 2020-21 academic session, I took charge from Founding Principal Mr. Yeshwanth Raj Parasmal. We build, expanded, and helped each student master core curricular skills in a safe and positive learning environment. We also focused in developing critical thinking to prepare students for high school and life. Reliance on technology was integral in the classroom, training students and parents to be digitally aware and independent was our prime focus.

In a typical day at 21K, we offered 3 periods with classes like English, Math, Science, EVS, Social Studies, Visual Arts, Dance, Computational Thinking and languages like French, Tamil and Kannada. Our Saturday, along with academics, was reserved for cocurricular sessions like Dance, Mindfulness, Cooking, Counselling, Shlokas, Rhymes etc. which involved specialists. The Summer School offered at the end of the year was a burst of fun filled activities ranging from Art & Craft, Pot painting, Clay moulding, Healthy cooking, Etiquettes, Coding, Fitness, Music and Movement, Dance, Storytelling, Creative writing, Public speaking, Mindfulness, Film making & Script writing, Netiquettes, to DJ'ing, Shlokas and more were all offered under one roof.

It is a pleasure to be part of a great school system where our goal is to 'create passionate learners' from Kindergarten to grade 5. We opened the school with a modest number of 300+ students pan India and internationally. In a year's time the school has developed a strong reputation across the country as the first of its kind online educational institution focused on quality teaching and learning.

During the year we reflected on what parents were saying about their children's needs and what staff and students were saying about theirs. We listened to various stakeholders and what each thought we as a school were doing really well and where the gaps were. We observed the expertise that existed within our community and together with the staff, children, and all stakeholders, upon where we might need to head into the future.

Change is an inevitable reality in life and schools are certainly not immune to the change process. From change, however, comes opportunity, and while we were certainly sad to say goodbye to friends and colleagues, we had to bid adieu to a few of our staff members and welcome new staff that have added value to the organization. I feel very blessed indeed to work with the calibre of staff and as the year ends, we are seeing the incredible fruits of all our planning, hardwork and collaboration.

On behalf of the whole school community, I sincerely thank 21K School's teaching staff-teachers for the incredible job you do. You are a cohesive group of educators who have worked hard all year to achieve both our shared goals and your own personal and professional goals. Our children are indeed in very caring, capable, and talented hands. To the technical team, many - many thanks for the wonderful roles you play in our school. A Principal could not ask to work with a more efficient, friendly, supportive, talented, professional, and hardworking team. I would also like to extend our heartfelt gratitude and thanks to our partners Oxford University Press for the academic support, SWAP 21 for the Pre-primary curriculum and Cambridge University Press for computational thinking resources.

And finally, to the fabulous and hardworking founders - together we have certainly achieved much that we can be immensely proud of this year - much of it behind the scenes, but nonetheless so important to the richness, colour, progress, and culture of our school. I continue to highly value your friendship, wise counsel, loyalty, maturity, and dedication as we continue to move forward into the promise of an exciting educational landscape in the years ahead.

As the school Principal, the quality of our staff and the potential we have for making a profound difference in the lives and the learning of the children in our care, has always been and continues to be of paramount importance to me.

HERE ARE SOME
GLIMPSES FROM OUR
INAUGURAL YEAR, WHERE
TALENTED STUDENTS
AND TEACHERS HAD
A WONDERFUL AND
FRUITFUL TIME.

NURSERY

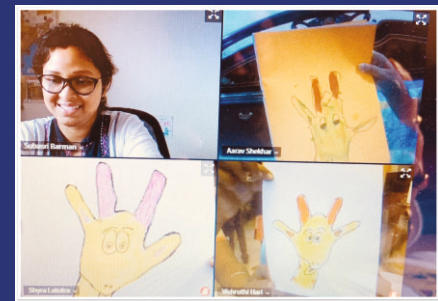

Learning Concepts

- Introducing basic skills to enable young children gain independence and understand the world around them.
- Teachers at 21K School introduce children to early learning concepts naturally through everyday activities, songs and playful games that stimulate children's curiosity.

Early Writing Skills

Engaging children in activities where expressing ideas through drawing and colouring activity to enhances concentration, fine motor and eye hand coordination for early writing skills and correct finger grip.

Cooking Activity

Cooking activity to develop children's thinking skills. It also allows them the opportunity to use prior knowledge and apply it by counting, measuring, following a sequence, following directions, cause and effect while focusing on motor skill development eye hand coordination.

Experiential Learning

Conceptual understanding in children ranging from simple to complex.

Concepts related to geography, duties of our community, learning about birds, vehicles, animals etc. done through experiential learning activities.

Motor Skills

Fine motor skills are the ability to make movements using the small muscles in our hands and wrists. The students below, trying to button and unbutton the shirt.

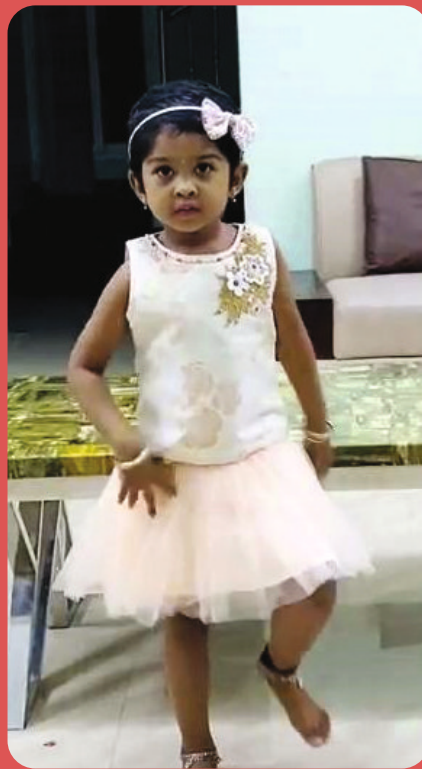

Communications Skills

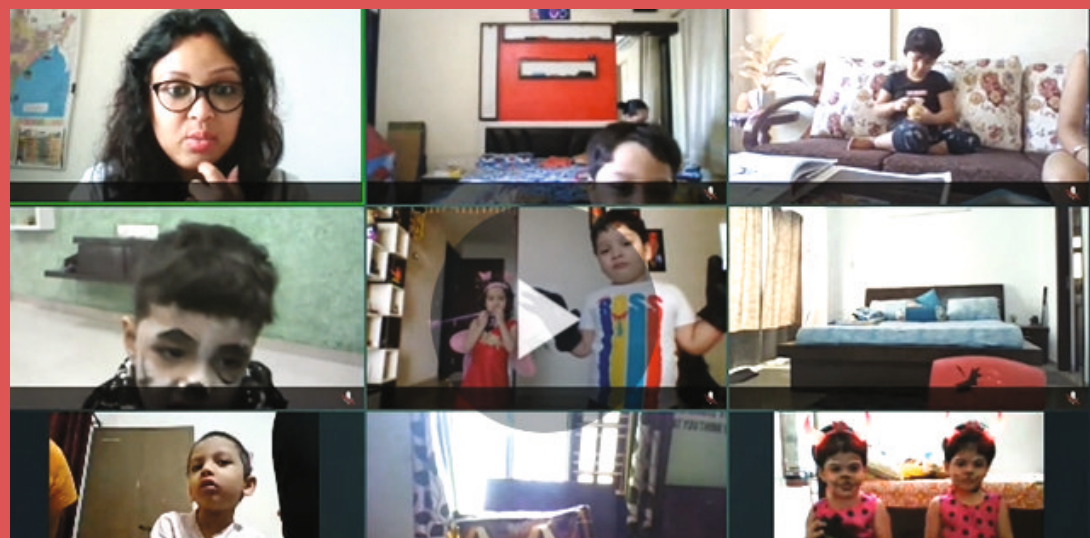

We also lay emphasis on communication skills where students express their ideas and feelings.

Rhyme Sessions

Dance Sessions

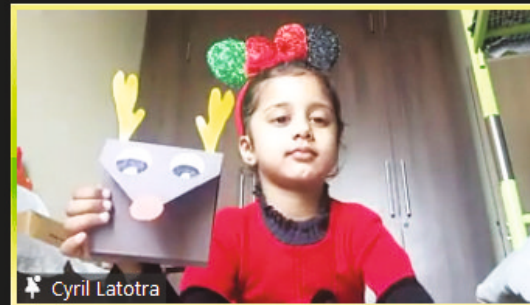

Celebrations

Celebrations

Cyril Latotra

Khushboo

Subasri Barman

Vishruthi

IPad (2)

Mammy

KG-1

In Kindergarten 1, we believe in celebrating the uniqueness of each child and encouraging them to be inquisitive explorers. The emphasis is laid on developing skills of the child through different learning engagements.

Fine Motor Skills

Drawing and colouring activities improve eye-hand coordination, while fine tuning their finger muscles and pincer grip. Being able to express what they feel also boosts a child's emotional intelligence.

Sensory Skills

The students had a multi-sensory experience that involved looking, touching, smelling, tasting and even hearing.

Cognitive Skills

The art & craft activities enhance the creativity of a child. The students learn to make correct and effective decisions, facing and solving artistic challenges which in turn helps to develop problem-solving attitude.

Project-Based Learning

We believe that students acquire deeper knowledge through active exploration and hands on experience. project-based learning helps students develop problem-solving skills, communication skills and thinking skills.

Seed Germination

Celebrations

KG-2

In KG-2, we help young children acquire essential physical, motor, cognitive, social, emotional and language skills. These skills allow children to think, solve problems, communicate, express emotions and form relationships. They build the foundation for later life and set the trajectory for health, learning, and well-being.

Students used their spatial awareness and creative skills to build a satellite. They learned about its parts and uses.

Solar System

Students got familiar with the solar system. They identified all the planets and learned to appreciate the wonders of the universe.

Sensory Skills

Students learnt about the world around them, this activity enhanced their creative and sensory skills.

Primary

Independence Day

The Independence Day celebration was held enthusiastically at 21K School. A grand assembly was conducted virtually, where the entire school was present for the celebration.

All the students wore colours of our tri-colour flag. The event started with a welcome speech, followed by the national anthem. Though it was a virtual assembly everyone was infused with the patriotic fervour.

The program began with a skit performed by the students of grade 5. The theme of the skit was 'Unity in Diversity'. We all enjoyed watching the children perform.

The skit was followed by a few dance performances like-Kathak, Bhangra and Folk dance. The students of grade 3 and 4 gave their speech in Hindi and English further advancing the diversity theme. The children sang patriotic songs and a 'Thank You' note was given by Grade 5 student.

Teacher's Day

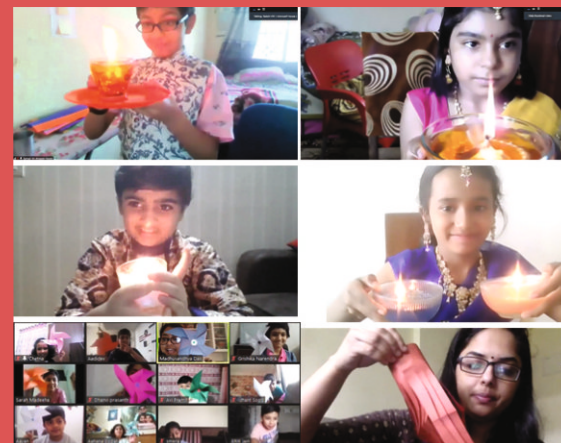

Teacher's day was celebrated on 5th of September 2020, at 21K School. On this day the children decided to do something special for their teachers.

A grand assembly was conducted virtually, where the entire school gathered. As soon as the meet started, the little ones started wishing their teachers. It was so wonderful to see the excitement and hear the heart-felt wishes!

The event started with a beautiful welcome speech by the students of grade 5. They chanted a shloka about 'Teacher' being their 'Guru' and the ultimate path to enlightenment. The children were well-prepared, they hosted the event.

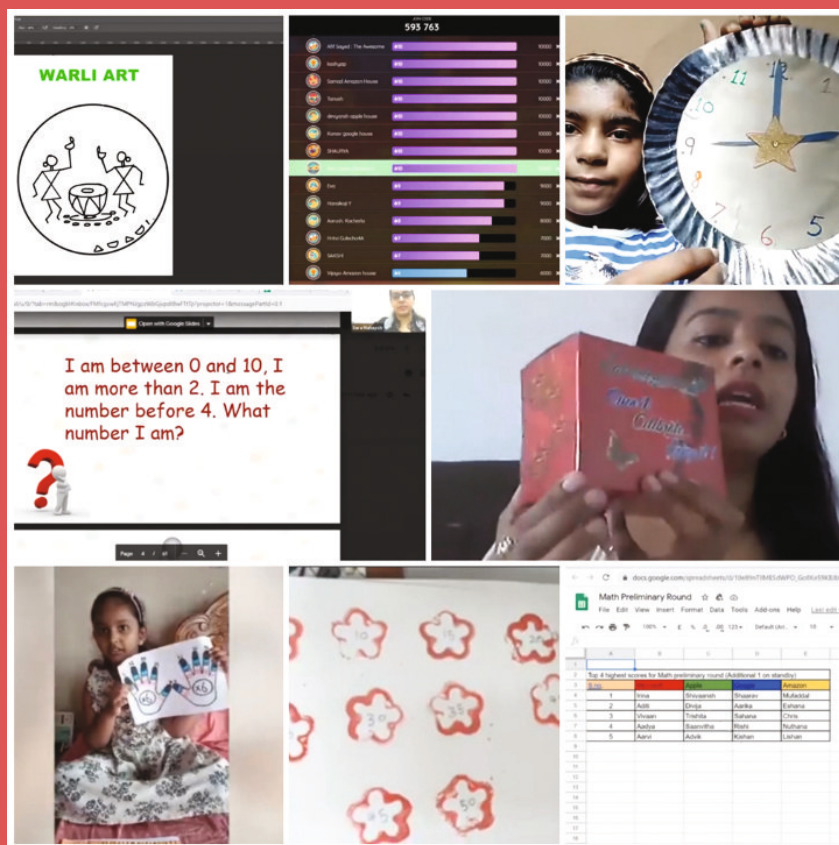

Diwali

Diwali and Children's Day were celebrated on the same day at 21K School. Various activities were conducted in different grades. The children made greeting cards on Diwali and Children's day. They made posters celebrating eco- friendly Diwali, also made paper lanterns, made diya's with water and oil and colours, rangoli, and decorated the diya's. Students were also reciting poems and stories in Hindi and had fun making items with paper-craft like pinwheels. As a part of Children's day fun time, we played games, quizzes and activities like dance and freeze.

Maths Week

Math fest was conducted with a lot of enthusiasm at 21K School. The fest was named as 'Mathalon', as its objective was like Marathon, perseverance and completion. Its objective was to create a culture and celebration around doing Math and creating a milestone moment that reminds that 'I can do Math and it is a part of my life'. The fest was conducted for a week from 2nd to 6th November, 2020. We tried incorporating interdisciplinary approach to develop connections between areas of learning. Mathematics is a key component to many different disciplines and an interdisciplinary Mathematical approach can help children focus on solving problems and understanding how things connect. From grade 1 to 5 for the entire week, we adopted an interdisciplinary approach. Wherein we merged Mathematics with all the subjects taught.

Spell-Bee

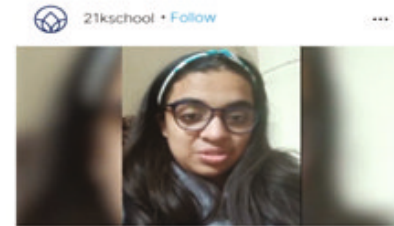

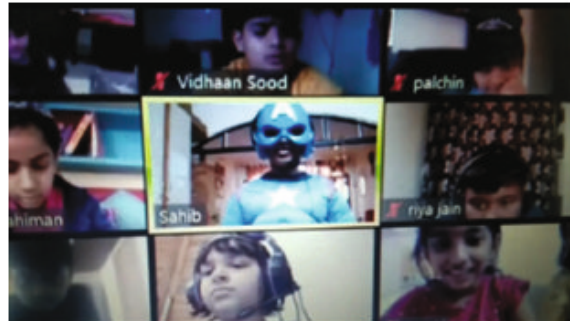

To understand the significance of spellings and vocabulary in the English language, the Spell Bee Quiz was conducted @21K School. The quiz was not a competition but a reflection of understanding and acknowledgement of the one of the most important aspects of language in our students. Throughout the year, our students have understood spellings not as a separate entity but an altogether understanding of their reading, listening and speaking skills. The quiz was conducted in two rounds and the children participated in this house-wise.

JANUARY 16

Author Visit

Language builds bridges, it makes communication easier and helps a person to make sense of the world around them. During language week from 9th to 16th January, we at 21K School tried to build bridges by connecting our interests, reading and love of books. Across the Grades from 1 to 5 the week started with the 'D.E.A.R' sessions. As the bell rang in each grade, we all dropped everything and read. We read our favourite stories, books and even poems.

This interesting session was followed up with 'Poetry Day' in which children across the grades wrote poems, rhymes or read them. Lower grade read and recited poetry and Grade 3, 4 and 5 composed poems- limericks, acrostic poems and haiku poetry. The effort and the happy smiles resounded in the classrooms.

D.E.A.R Grade 5 A Reflection

Your Experience of D.E.A.R

Aashi: Jataka Tales

Today I read *Jataka Tales*. It is a very famous book with about 25 stories and 158 pages. Some of them are moral stories. There are many titles in this series. Today was the best class ever with all of us reading stories!

Aadidev- Magisterium: The Copper Gauntlet

This is an awesome book with lots of humorous scenes, lots of drama, and a lot of different plot twists which make me gasp. It also has lots of sorcery and thrilling scenes which makes me wonder what will happen next. This book is amazing and fun to read.

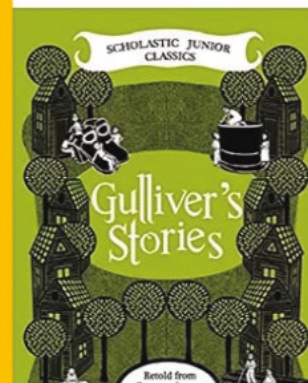

Chetna- The Boys Who Fought

I read "The Boys Who Fought" by Devdutt Pattanaik. "The Boys Who Fought" is a kid's version of Mahabharat. I chose this book cause first when I saw Mahabharat (on T.V.) I found it very- very interesting and wanted to know more about it. The book is excellent!

Vidya singh Rajput

Art Fest 2021

We were all artists during the 'Art-Fest' event @21KSchool.

On 19th February 2021 'Art Fest ' was held across all the grades. It was not a contest, it was a festival. A festival of thoughts, expressions and colour. It celebrated the spirit of being free and able to express ourselves freely without inhibition through the medium of art.

21K School was infused with a colourful festive mood throughout the event.

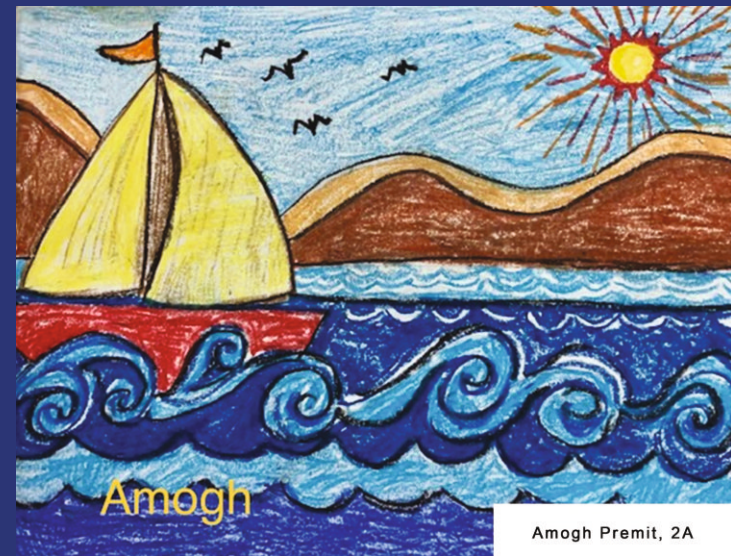

Children were so excited to be a part of this.

The two topics were:

- Art from the heart.
- Finding a new world.

Amogh Premit, 2A

Sahana Banerjee, 1A

Science Week

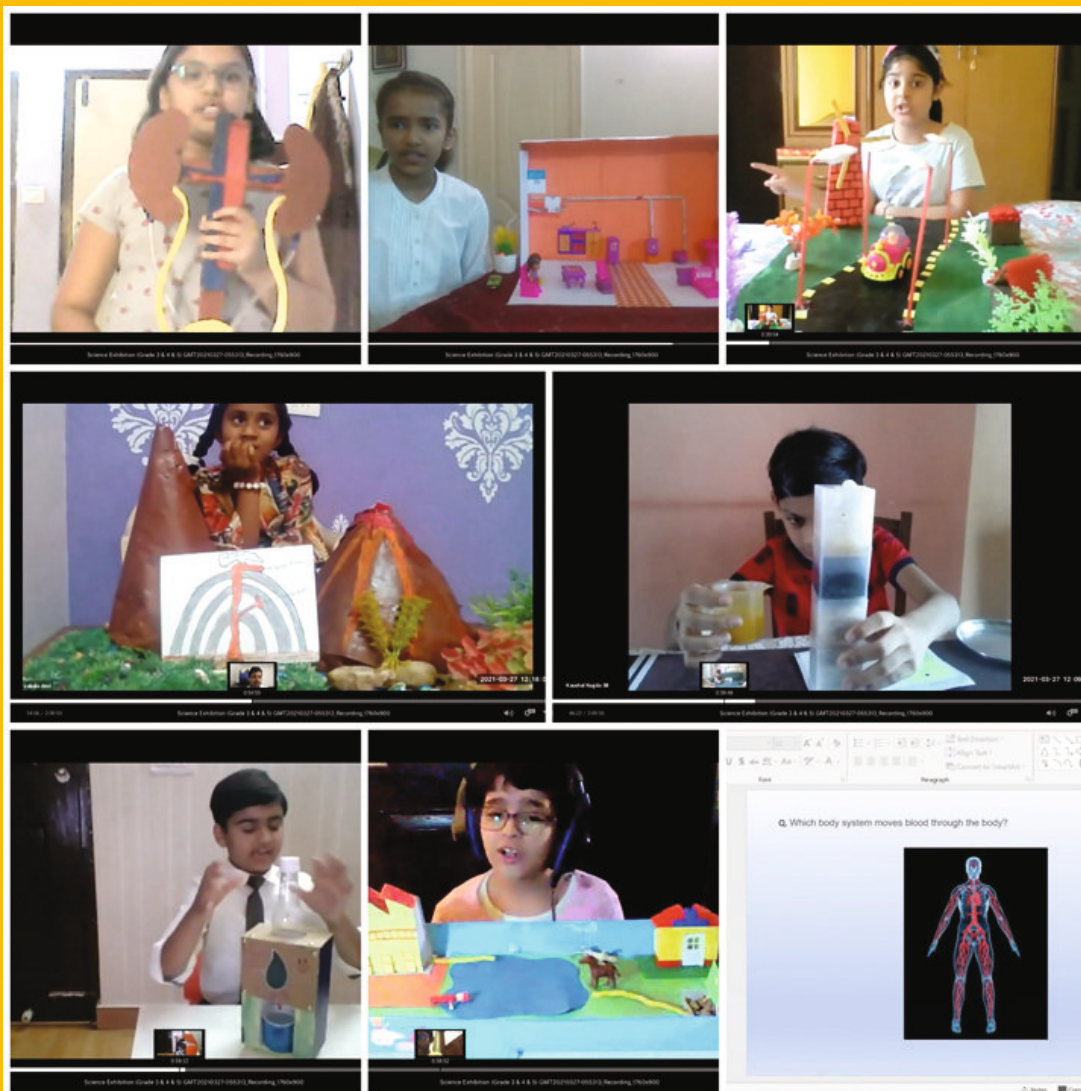

Science week was initiated at 21K School with a vision to analyze a scientific occurrence with an investigation or to solve problem with an invention. The themes were decided based on the age - groups / grades of the children. Inspired, encouraged and motivated by the teachers and parents, the budding scientists of 21K School displayed different models and experiments with great enthusiasm and excitement. The event lasted for a week, the children were given the topics a week before so that they can plan out their projects. The themes provided for different grades were as follows:

Grade 1 and 2-Life below water;
Life on land; Clean water and
sanitation; Good health
and well-being; Climate Action.

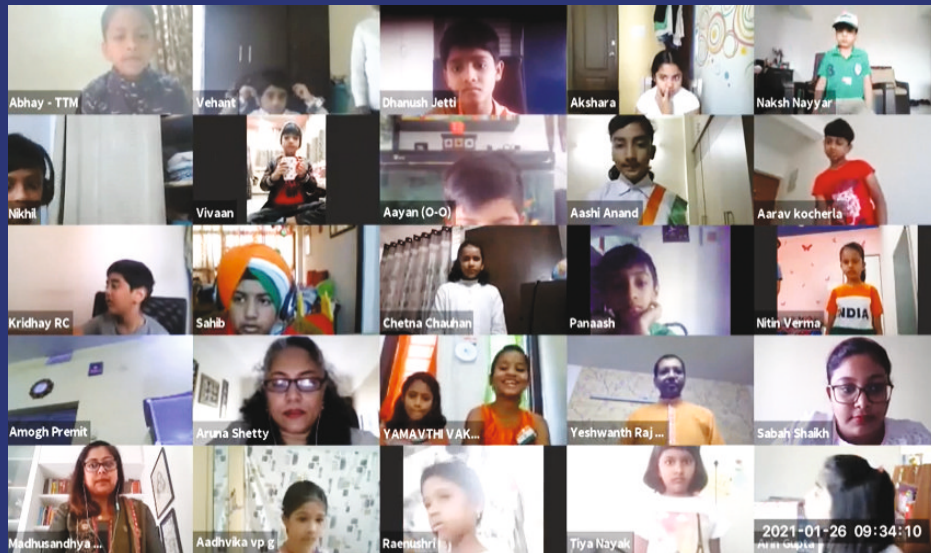

Grade 3-Life Below Water; Life on
Land; Climate Action; Clean water
and sanitation; Good health and
Well-being; Earth's interior; Habitats
and animal adaptations; Oceans and
atmosphere; Earthquakes, Volcanoes,
and the movements of Continents;
Water pollution.

Grade 4 and 5-The children
were given a theme 'Sustainable
development' and were allowed
to choose the topics independently,
keeping sustainable development
in mind.

The projects were judged by
the school teachers internally,
the finalists from each grade
presented their projects in front
of the judges and were given
certification based on various criteria.

72nd Republic Day

The 72nd Republic Day was celebrated in all its solemnity and grandeur through the online platform in 21K School on 26th January 2021. Students took pride in celebrating the spirit of “Unity in Diversity”.

The event started with the hoisting of the virtual National Flag by our Co-founder & COO, Mr. Yeshwant Raj Parasmal followed by a rendition of the National Anthem. A short special assembly was put up by the students of Grade 5. They performed a role play to explain the Constitution of India, Fundamental Rights and Duties, the power of government, and the role of parliament in India.

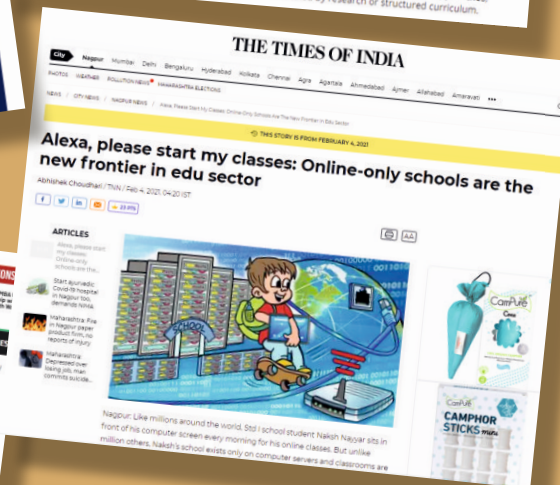

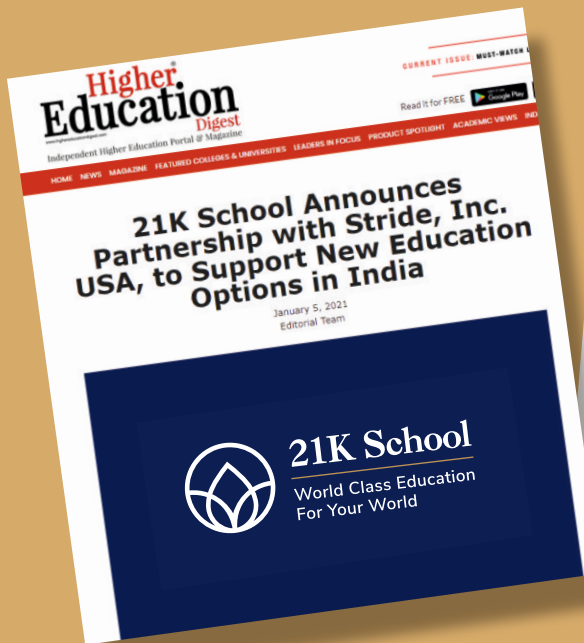

Christmas Carnival

The celebration began a month before Christmas with ‘Act of Kindness’. Teachers spoke about the act of kindness / sharing and the joy it brings to both giver and the receiver. Students were asked to do small deed of kindness and share the pictures or videos of the same.

To soak in the spirit of Christmas, a week prior to the event, Christmas carols were heard playing in all the classes. Students enjoyed to the beats of ‘On the first day of Christmas, Feliz Navidad, Joy to the World, Rudolph the Red Nosed Reindeer’ etc.
